Empathy Map Canvas:

An Empathy Map Canvas is a visual tool used to better understand a user's thoughts, feelings, behaviors, and experiences. It is typically divided into sections—what the user says, thinks, feels, does, sees, and hears—to capture different aspects of their perspective. This helps businesses, designers, and marketers gain deeper insights into customer needs, motivations, and challenges. By using an empathy map, teams can create more user-centered products, services, and experiences, ensuring they address real problems and improve customer satisfaction.
